Overcome Your Fear of Difficult Documents

Versatility, high-speed and superior reliability make the Xerox® DocuMate® 4799 a powerful scanner for demanding environments. With up to a 40,000 page per day duty cycle, this innovative workhorse scans up to 112 pages per minute and employs three advanced sensor systems: ultrasonic double feed detection, stapled document detection and intelligent feed control to ensure that your scan job will not get interrupted.

Documents of various sizes can be stacked together in the automatic feed tray without worry because the Xerox® DocuMate® 4799 employs not one, but three ultrasonic double feed detection sensors to cover the entire width of a document. The scanner also detects stapled multi-page documents and halts the scanning process — minimizing damage to the optical glass and your documents. The thickness of documents being fed into the scanner is also monitored, automatically adjusting the roller pressure to ensure that all pages are accurately fed. This combination of sensors creates one of the most reliable feed mechanisms available today.

Up to 350 mix-sized documents can be stacked in the center of the automatic feeder. There is no need to organize documents according to their size, so scanning is fast, easy and efficient. A pre- and post-scan imprinter is also available for the Xerox® DocuMate® 4799 and is supported through the included TWAIN™ and ISIS® drivers.

Advanced Image Processing Technology

The Xerox® DocuMate® 4799 provides both high quality Image Enhancement and increased productivity when combined with Visioneer Acuity – the 'Corrective lenses for your scanner'. With all of the image cleanup and enhancement features of Kofax® VRS™ Pro and Visioneer Acuity, the result is a finely tuned, sharp, and clear image every time you scan. Advanced features like Auto Color Detection, Auto Rotation, Blank Page Removal are included with the software. No 'Upgrade now for more features' is required. We provide it all. Combine this with Visioneer's industry-leading TWAIN™ driver technology, DriverPlus, and you get the most robust, fully-featured high quality scanning solution in its class. Integration with industry standard TWAIN capable capture applications becomes a breeze, as every single Acuity feature is readily accessible through the drivers elegant yet user friendly interface.

The Xerox® DocuMate® 4799 is very easy to maintain. Its unique "clamshell" design allows full access to the entire paper path so you can clean the unit without calling a service technician. It is quick and easy to replace the rollers, inspect the path and get back to scanning. This reduces the amount of downtime and improves the unit's cost effectiveness.

Designed for document capture and workflow the Xerox® DocuMate® 4799 delivers everything you ever wanted in a high-speed document scanner: productivity, reliability and innovation.

Xerox® DocuMate® 4799 Scanner Software Solutions

Image Enhancement Technology

Visioneer® OneTouch® works seamlessly with Visioneer Acuity or Kofax VRS.Both integrate with OneTouch via the Visioneer DriverPlus TWAIN drivers, which allows basic settings to be applied from within the OneTouch interface. Using advanced algorithms and dynamic thresholding, they effectively improve the visual clarity of every scan, applying intelligent correction to imperfect images, increasing OCR accuracy, and saving time.

Nuance® Searchable PDF Solution

Nuance OmniPage® and PDF Converter provide everything you need to create, convert, edit, assemble and securely share searchable PDF files with precision OCR analysis, advanced layout detection and Logical Form Recognition™ (LFR) technology. Combining powerful functionality, superior Microsoft® Office® support and DMS integration into one package.

Office Gemini Dokmee Capture

Dokmee Capture production scanning software provides all the features required for document capture, processing and reporting. It allows businesses both large and small to easily convert their scanned documents into digital files, capture images and information contained in them, and then organize it all into searchable data. This mission-critical business information is then placed into a centralized location to be easily searched, stored and retrieved when needed.
