

HP COLOR LASERJET 5 AND 5M PRINTERS

Lower Prices and Upgraded Photographic Output

Recently, HP upgraded its reliable, high-performing Color LaserJet 5 and 5M printers and lowered the prices by 31%. These enhanced printers offer the same 1200 dpi-equivalent print quality and fast two-to-three page-per-minute color printing that has helped the

Color LaserJet 5 and 5M printers secure over 67% of the color laser market*. Their pre-installed HP JetDirect card for ethernet and local talk environments, genuine Adobe PostScript Level 2 software and 36 MB memory, continue to make them an excellent choice for most workgroup environments.

Enhancements improve the quality of photographic printing output and deliver color prints at a faster rate.

Printers with serial numbers beginning with the letters JPAF through JPGF need to purchase an upgrade kit. It should be installed by an authorized HP service reseller. Others can obtain drivers from the HP Distribution Center at (970) 339-7009.

Features and Benefits

- Faster photo printing technology improves bit-mapped image print speeds by up to 5 times.
- An HP Color CD provides users with helpful tips for improving their use of color.
- HP Business Borders software provides templates for creating brighter, more interesting business documents.
- HP Swatch Tools software makes finding the perfect color scheme easy.
- By Design software provides templates and clip art to enhance color documents.
- An Optional HP Support/Installation Pack aids with printer setup and installation.
