The essentials of imaging

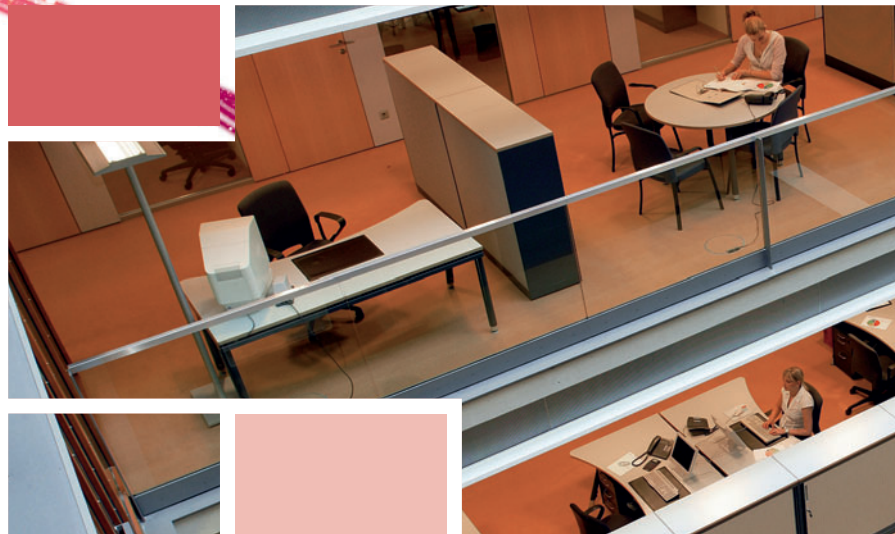

bizhub C30P

Unique in its class

Office system bizhub C30P

Versatile printing in colour and black & white

When it comes to speedy colour printing – an essential task in the modern office – the bizhub C30P really shows its talents! Performing admirably in colour and black & white, it impresses with speed and versatility: Options like duplex printing, an extended paper supply and finishing capabilities not available on any other device in its class turn it into a real workgroup printer. As such, the flexible bizhub C30P perfectly complements larger output systems – whether as small networked device or as convenient desktop printer for instant output from one or more workstations.

- Surprisingly productive, the bizhub C30P churns out 30 colour or 35 b/w prints per minute. As a real “bizhub” it features simple and intuitive operation and integrates seamlessly into the new-generation bizhub product range.
- Same as its multifunctional bizhub counterparts the bizhub C30P uses latest Emperon controller technology and is conveniently administrated with the help of standard PageScope software tools. And equipped with Konica Minolta’s new high-definition Simitri® HD polymerised toner the bizhub C30P impresses with its image quality, no matter whether prints are in colour or black and white.

- Thanks to its perfect compatibility the bizhub C30P is at home anywhere, in Windows®, Mac® and Linux® environments. Adding quality, convenience and efficiency to existing installations in any busy office, Konica Minolta’s versatile colour printer helps avoid bottlenecks in printing and ensures a smooth overall performance of the whole team.

→ Configurations

bizhub C30P 

Better quality, more performance

→ Powerful Emperon™ controller

Equipped with Konica Minolta's latest Emperon™ controller technology and featuring a PowerPC® 867 MHz page-processor plus standard 256 MB RAM (upgradeable to max. 1,024 MB), the bizhub C30P delivers perfect prints in an instant and handles even heavy workloads with ease. Windows®, Mac® and Linux® compatible, the Emperon™ controller provides both PCL 6 and PostScript 3 printing as standard for any network environment.

→ Universal accessibility

With Ethernet and high-speed USB (2.0) support connecting the bizhub C30P is straightforward and efficient. A parallel interface is also included and provides an alternative connection for example to an individual workstation. An added convenience, the USB connection also enables the USB direct print functionality, for example straight from a USB stick.

→ Above-average quality

Thanks to the advanced capabilities of Simitri HD, Konica Minolta's high definition polymerised toner, the bizhub C30P delivers better-than-average print quality and high durability. Its quality is supported by 600 x 600 dpi x 4-bit PhotoART-9600™ contone technology, which equals 9600 dpi resolution: This varies the colours of individual pixels to a greater degree, providing better printing precision, enhanced picture detail and smooth colour gradations.

→ Convenient monitoring and control

Konica Minolta's optional user account management feature, the PageScope Data Administrator, provides a comprehensive functionality, e.g. volume monitoring and control of individual users and user groups,

allocation of print costs to user accounts, and capacity tracking of output devices. Also including LDAP support, this accounting functionality is of particular interest for installations where the bizhub C30P complements existing bizhub multifunctionals.

→ Impressive versatility

A real cost saver, draft print mode is the economic printing alternative for internally used documents: Although toner consumption is reduced by up to 50%, all text remains perfectly legible! Extending the b/w toner yield up to 12,000 prints, this makes the bizhub C30P perfect also for longer print runs. Other features further underline its versatility: Banner printing for example enables the processing of outsized banner sheets that can be A4-high and up to 1.2 metres long – ideal for display materials!

→ Optional flexibility

Equipped with the optional finisher, the bizhub C30P offers an output capacity of up to 600 sheets and produces sorted and stapled documents. Its versatile functionality is further enhanced with an optional duplex unit for paper-saving double-sided printing. Up to two additional paper trays upgrade its paper capacity to max. 1,200 sheets.

→ Practical PageScope utilities

Web-based device management is available with PS Web Connection, informing users on the status and settings of the bizhub C30P right on their PC monitor. PS Netcare enhances the administrator support, providing fast access and simple monitoring on the network.

Unique in its class, the bizhub C30P brings versatility and flexibility to workgroup colour and b/w printing.
