# Aficio® 1022/1027

RICOH®, a pioneer and leading manufacturer in the development of leading-edge digital office technology, presents two highly capable document imaging solutions for today's busy small to mid-volume businesses or workgroups — the Aficio® 1022/1027 Integrated Digital Imaging Systems. Featuring Ricoh's exclusive

**Next Generation Architecture,** the Aficio 1022/1027 offer superb performance, professional image quality and exceptional affordability— all in a compact, space-saving design. With these impressive 22/27 digital copies per minute engines, you can tailor a solution that precisely meets your document

*Engineered for Today's  
Technology Driven  
Workplace*

**Automatic Reversing Document Feeder (ARDF)**

management requirements. Start with the Aficio 1022/1027 digital copier and then upgrade—when you decide the time is right —with network printing/scanning, faxing and LAN-faxing options. And, regardless of how you configure your Aficio 1022/1027 solution, you're guaranteed immediate gains in overall productivity.

**Time-Saving Technology Quick Start Up (QSU)**

Equipped with Ricoh's revolutionary QSU technology, the Aficio 1022/1027 requires less than 10 seconds to come back from Sleep Mode. Contrast this to up to 30 seconds from low Power Mode, which is typical of conventional systems. The Aficio 1022/1027 provides superior performance and productivity with a reduced amount of energy consumption, saving time, energy, and money.

**Exceptional Document Management**

Like the Aficio® 1035/1045 Series, the Aficio 1022/1027 presents a new generation of Aficio office solutions. These are more than multi-functional products. They function as document managers at the center of your department, streamlining the network document flow. A variety of applications become available to their users.

**Optional Document Server**

The Aficio 1022/1027's "scan once, print many" technology allows users to scan documents directly into the powerful 6.0GB Document Server. And via the ScanRouter V2, software users can integrate hard copy and/or electronic input quickly and easily in a variety of applications, making the production of complex, multi-section documents simple.

**Imaging**

Via the system's optional network scanner, the ever-increasing piles of paper can be easily tackled.

**Storage**

After documents have been scanned and converted to images, they can be stored on the system's integral Document Server, which acts as a document repository.

**Access, Search and Retrieve**

Via the DeskTopBinder V2 software package users will be able to access the stored information. They can search the repository and view the documents from their own PC.

**DeskTopBinder V2**

**Output and Distribution**

Data stored in the Document Server can be printed, copied and/or faxed. From the Document Server it can also be re-printed, re-faxed, or digitally re-distributed whenever and as many times as required by any user connected to the network. As an added advantage, this output can be professionally finished according to preference.

With the Aficio 1022/1027 as the central hub of your small workgroup, all your copy/print/scanner/fax data can be stored, managed and distributed efficiently.

**Partners With the Environment**

Long committed to implementing sound environmental design concepts, Ricoh engineers have created digital imaging systems that combine stellar performance with superior energy conservation capabilities. In fact, this design earned the Aficio 1035 the distinction of being named the International Energy Agency's (IEA) world's first "Copier of the Future".

Like the Aficio 1035, the Aficio 1022/1027 offers a suite of sophisticated energy conservation technologies, which reduce energy consumption and include:

- **Ultra-low Power Consumption During Sleep Mode**
- **Quick Start Up (QSU) Technology**
- **Enhanced Energy Efficiency**
- **Outstanding Duplex Productivity**
- **Newly Designed Toner Bottle and Toner Recycling System**
- **Environmentally Friendly Design**
