Aficio® 1035/1045 Series

Empowered to Make Your Office More Productive and Efficient

A multitude of information comes to us every day from various sources. Either in paper or in digital format, received via email and across the network. All this data needs to be sorted and processed one way or another, whether this entails printing, faxing, copying, etc.

Wouldn't it be fantastic if this daily data flow—imaging, storage, retrieval and output/distribution—could be streamlined from one location?

RICOH®, a pioneer and leading manufacturer in the development of cutting-edge digital office equipment, presents two powerful, yet easy to use, imaging solutions for

today's technology driven workplace—the Ricoh® Aficio® 1035/1045 Series Integrated Digital Imaging Systems.

The Aficio 1035/1045 Series combines an impressive 35/45 digital copies per minute engine, with Ricoh's new **Next Generation Architecture** technology to provide exceptional image quality, superior performance and productivity, right at your fingertips.

Ricoh has also made it easier to purchase the right system for today's office environments. Deciding which Aficio 1035/1045 series is right for your office is as easy as selecting between two basic configurations.

Start with the Aficio 1035/1045 digital copiers and upgrade with network printing/scanning, faxing and LAN-faxing options as the need arises.

Or choose the Aficio 1035P/1045P digital copier/network printers, which come standard with all the digital copier functionality and have added printing, extra memory and a network interface card. Network scanning, faxing and LAN-faxing can be added as the need arises.

With combined copying, faxing, network printing and network scanning capabilities, these innovative new products from Ricoh respond with sophisticated digital technologies that enhance productivity.

Ricoh Reliability

Leading-edge Ricoh engineering enhances productivity and meets the demands of every workgroup.

Time-Saving Technology Quick Start Up (QSU)

Equipped with Ricoh's revolutionary QSU technology, the Aficio 1035/1045 requires less than 10 seconds to come back from Sleep Mode (15 seconds for the Aficio 1045). Contrast this to up to 30 seconds from Low Power Mode, which is typical of conventional systems. The Aficio 1035/1045 provides superior performance and productivity with a reduced amount of energy consumption, saving time, energy, and money.

Simplicity at Your Fingertips, Touch Panel Display

The Ricoh Aficio 1035/1045 deliver a user-friendly Panoramic Touch Panel Display. The display screen conveniently features all input selections on the left-hand side, such as *Original Mode*, *Image Quality* selections and *Special Originals*. Move to basic copying selections for *Paper Size*, *Reduction* and *Enlargement*, and user-defined *Shortcut Keys*, grouped together in the center; then find all *Finishing* selections positioned at right.

Enhanced Duplex Productivity

Where duplex productivity is concerned, the Aficio 1035/1045 boast the latest technological enhancements to increase reliability. Outputting at 95% of simplex speed, the *Stackless Interleave Duplexing* further streamlines two-sided output like never before, allowing your office network to perform limitless duplex copying or printing of jobs as large as 11" x 17".

Job Preset Keeps Jobs In Line Instead Of You

With the highly productive *Job Preset* capability, you can conveniently scan an

additional job into memory, even while the current one is being processed, allowing you to attend to other important tasks.

Flexible Stamping Functions For Customized Documents

Several useful stamp functions are featured on the Aficio 1035/1045 to jazz up reports, memos, booklets, etc. Choose from eight *Preset Stamps* or scan *User Stamps* for placement on the first or each page of any documents. Even add *Background Numbering* or *Page Numbering* in a variety of positions using the Touch Panel Display. Plus, print the current date on every page in any of six page locations with handy *Date Printing*.

Exceptional Document Management

With the Aficio 1035/1045 Ricoh presents a new generation of Aficio office solutions. These are more than multi-functional products. They function as document managers at the center of your department, streamlining the network document flow. A variety of applications become available to their users.

Document Server

The Aficio 1035/1045's "scan once, print many" technology allows users to scan documents directly into the powerful 10GB Document Server. And via the DeskTopBinder™ V2 Lite, software users can integrate hard copy and/or electronic input quickly and easily in a variety of applications, making the production of complex, multi-section documents simple.

Imaging

Via the system's optional network scanner, the ever-increasing piles of paper can be easily tackled.

Storage

After documents have been scanned and converted to images, they can be stored on the system's integral Document Server, which acts as a document repository.

Access, Search and Retrieve

Via the bundled software package, users will be able to access the stored information. They can search the repository and view the documents from their own PC.

Output and Distribution

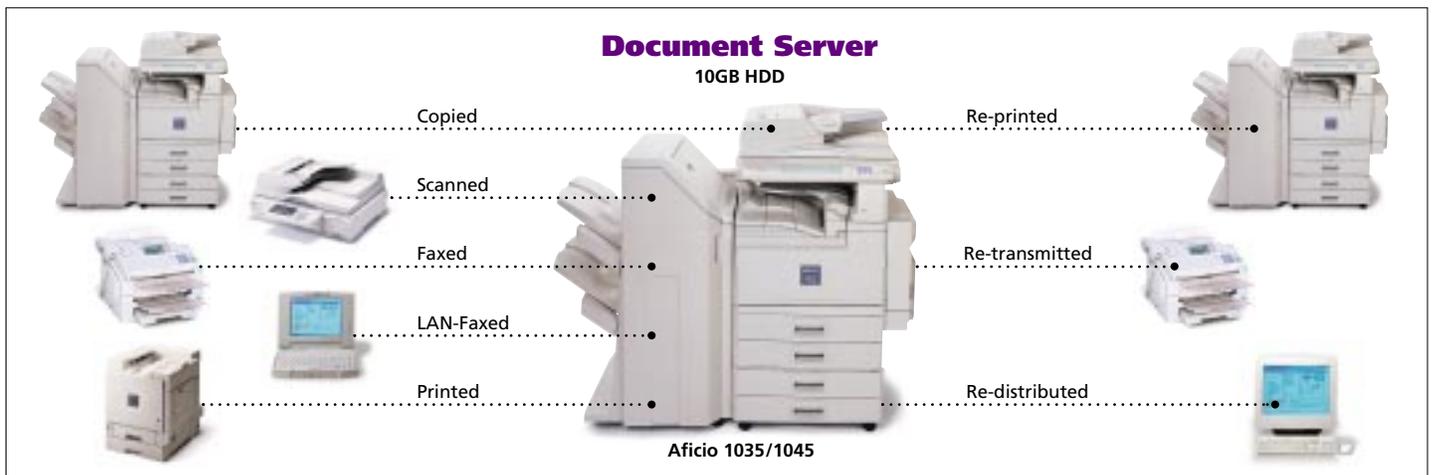

Data stored in the Document Server can be printed, copied and/or faxed. From the desktop, data can also be re-printed, re-faxed, or digitally re-distributed as many times as required by any user connected to the network. As an added advantage, this output can be professionally finished according to preference.

With the Aficio 1035/1045 as the central hub of your department, all your workgroup's copy/print/scanner/fax data can be stored, managed and distributed efficiently.

Partners With the Environment

Long committed to implementing sound environmental design concepts, Ricoh engineers have created a digital imaging system that combines stellar performance with superior energy conservation capabilities. In fact, this design earned the Aficio 1035 the distinction of being named the International Energy Agency's (IEA) world's first "Copier of the Future". A suite of sophisticated energy conservation technologies combine to reduce energy consumption and include:

- **Ultra-low Power Consumption During Sleep Mode**
- **Quick Start Up (QSU) Technology**
- **Enhanced Energy Efficiency**
- **Outstanding Duplex Productivity**
- **Newly Designed Toner Bottle and Toner Recycling System**
- **Environmentally Friendly Design**
